college, Shri Mhalsakant Vidyalaya & Jr College, Pune
June 2021

Bachelor of Science in Computer Science, Pratibha College of Commerce and Comp. Studies, SPPU, Pune
August 2024

★ PROJECTS

Profile Card
Built with HTML, CSS, and JavaScript, showcasing smooth hover effects, custom animations, and a fully responsive design that works beautifully across all devices.

PayPal Clone
This project appears to be a front-end clone of PayPal, designed as a static HTML, CSS, and JavaScript website.

Randomideas App
This is a fullstack application for sharing random ideas. It is a project in my Modern JS From The Beginning course.This app includes a Node.js/Express REST API that uses MongoDB for a database. The client-side is built with Webpack.

Tracalorie App
This is the Webpack version of the Tracalorie app from the Modern JS From the Beginning course. It is an app to track calories, meals and workouts.

Shopping list App
This project was created to focus on working with the DOM, events, state, local storage and other fundamentals of JavaScript.

Portfolio website
Portfolio showcasing projects and skills in web development! The site highlights my work with modern technologies like React, Node.js, and more.
